GSI
ALL SIGNAL. NO NOISE.

June 23, 2026

To Whom it May Concern,

We have received your request for information regarding material changes in internal controls related to Global Systems Integration's System ("GSI"). UHY prepared the latest SOC 2 for this system and the report is for the period April 1, 2025 through March 31, 2026. The report includes tests of controls' design and operating effectiveness.

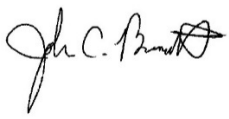

GSI recognizes the need to maintain an appropriate internal control environment and report upon the effectiveness, as well as material changes to its internal controls. As of June 23, 2026, GSI is not aware of any material changes in our control environment that would adversely affect the Auditor's Opinion reached in the June 23, 2026 report for the above named SOC 2.

You should also be aware that GSI, as a normal part of its operations, continually updates its services and technology as appropriate. In addition, the controls for all of GSI were designed with certain responsibilities required of the system users. GSI's controls must always be evaluated in conjunction with an assessment of the strength of these user controls.

GSI is currently in the examination and audit process with UHY. Our estimated date for completion of the 2026/2027 report is in the June 2027 timeframe.

Finally, in order to conclude upon the design of internal controls for GSI, you must read the current SOC 2 report.

Sincerely,

John Bassett
